

Now Available!

Penda Science has recently acquired Scantron's entire science assessment bank. Hand curated by Penda's Content Development Team, teachers have access to a mini assessment containing 5 multiple choice questions for each and every FL NGSSS.

Bias Sensitivity

All assessment items have been analyzed to ensure they are free from any potential biases such as cultural or linguistic differences, stereotype threat, or cognitive or physical disabilities.

Valid and Reliable

Assessments have been curated to ensure the results obtained from them are trustworthy, useful, and meaningful.

Mini Assessment Usage Ideas

- ← gauge prior knowledge
- ← checks for understanding
- ← exit tickets
- ← strategically practice highly assessed standards for SSA/EOC

Standards Aligned

Assessments use state standards to ensure they are accurately aligned to the same knowledge and skills as the standards require.

Rigorous

Assessments are designed to match the rigor of district and state high-stakes assessments, giving teachers accurate data to make instructional decisions.

Psychometric Analysis

All assessment items have been thoroughly analyzed to ensure the quality meets the desired standards, and they accurately measure the construct it was designed to assess.

Engaging

Through our unique gamification elements, students are more likely to be actively involved and invested in the process of completing the assessment.
